

MUHAMMAD ABDULLAH SHAHID

Junior Full Stack .NET Developer

Lahore, Pakistan | 0320-8456760 | 146ammughal@gmail.com | [linkedin.com/Abdullah-shahid](https://www.linkedin.com/Abdullah-shahid) | github.com/Abdullah-Shahid | [Abdullah-shahid-portfolio](#)

PROFESSIONAL SUMMARY

Junior Full Stack .NET Developer with approximately 1 year of professional experience developing and maintaining enterprise web applications across production systems. Hands-on experience with ASP.NET Core, C#, Entity Framework Core, SQL Server, React.js, and MVC architecture, including RESTful API development, JWT authentication, role-based access control (RBAC), and CRUD-based business workflows. Currently contributing to Opera News, a .NET 10 (ASP.NET Core MVC) enterprise CRM system, in addition to production HR and real-estate portal applications. BSc Computer Science graduate (2025) with self-directed full-stack projects on GitHub.

TECHNICAL SKILLS

Backend: ASP.NET Core, ASP.NET Core MVC, C#, Web API, Entity Framework Core, LINQ, Dependency Injection, Repository Pattern

Frontend: React.js, JavaScript, Razor Views, HTML, CSS

Database: SQL Server, MySQL, Stored Procedures, Database Design, EF Core Migrations

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC)

Tools & APIs: REST APIs, Swagger / OpenAPI, Git, GitHub, Visual Studio, VS Code

Principles: SOLID, OOP, Layered Architecture, MVC, Debugging

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Jul 2025 – Oct 2025

Wavenest · Lahore, Pakistan

Stack: ASP.NET Core · C# · React.js · Entity Framework Core · SQL Server · JWT · Git

- Built and maintained WavePeople, a production HR management system used across 5 functional modules: attendance tracking, leave management, payroll, employee performance, and asset management.
- Developed RESTful API endpoints secured with JWT authentication, powering HR data operations consumed by the React.js frontend.
- Diagnosed and resolved 15+ production defects across the ASP.NET Core backend and React.js frontend, improving application stability and reducing repeat bug reports.
- Collaborated with a 4-person development team using Git and GitHub, working across shared branches in a professional workflow.

.NET Developer

Nov 2025 – Present

Codexa Systems · Lahore, Pakistan

Stack: ASP.NET Core · C# · JavaScript · HTML · CSS · Razor Views · SQL Server · Entity Framework Core · MVC

- Support development of the E-Flex enterprise management portal and the Opera News Article & Publication Management CRM, building business forms, workflow integration, data management, and administrative features.
- Built dynamic business forms using ASP.NET Core MVC, replacing manual data-capture processes for operational workflows.
- Identified and resolved frontend and backend defects across multiple modules, improving application functionality and user experience.
- Wrote SQL queries and developed stored procedures to support data retrieval and business report generation.
- Delivered assigned sprint tasks on time within an Agile team, contributing to daily stand-ups and sprint reviews.

ENTERPRISE PROJECTS

WavePeople — HR Management Platform — Wavenest

Stack: ASP.NET Core · React.js · Entity Framework Core · SQL Server · JWT · RBAC

- Implemented 3-tier role-based access control (Admin / HR Manager / Employee), securing data access across all API endpoints.

- Designed relational database schema elements and optimized queries supporting employee lifecycle workflows and management reporting.

E-Flex — Real Estate Enterprise Portal — *Codexa Systems*

Stack: *ASP.NET Core MVC · JavaScript · Entity Framework Core · SQL Server*

- Delivered core workflow features for the real estate portal covering property listing, contract management, and client onboarding.
- Built reusable form components and generated operational reports using SQL Server stored procedures.

Opera News — Article & Publication Management CRM — *Codexa Systems*

Stack: *ASP.NET Core MVC · .NET 10 · C# · Entity Framework Core · SQL Server · Razor · JavaScript*

- Developing and enhancing an article/publication management CRM, working across article management, authors, publication metadata, journals, and workflow/administration modules.
- Implemented role-based access control and permissions to manage user access across administrative and workflow functionalities.
- Implemented dynamic forms and configurable access-type logic (Open, Closed, Hybrid) for article submission and publisher workflows.
- Modified Entity Framework Core models and SQL Server schema, including database migrations, and built Razor/JavaScript functionality for authors, universities, publication metadata, article search/filtering, home page layouts, and system themes.

ADDITIONAL PROJECTS

- Self-directed full-stack projects using ASP.NET Core backend APIs and React.js frontends, applying REST API design, EF Core, and SQL Server — available on GitHub.

EDUCATION

Bachelor of Computer Science

2021 – 2025

Lahore Garrison University · Lahore, Pakistan

Relevant coursework: Data Structures & Algorithms, Database Systems, Software Engineering, OOP, Web Development.

CERTIFICATIONS & LEARNING

- Microsoft Learn — Completed 9 structured learning paths (50+ modules) covering C#, ASP.NET Core, REST API development, OOP, and backend engineering.
- Ongoing: xUnit testing, clean architecture, Azure fundamentals, and microservices concepts through self-directed study and project implementation.
